Subject: Microsoft

There will be more entrepreneurs able to invent or design better programs and equipment than we have today. Microsoft was and is a very important contribution to the world..

I appreciate the advances that have occurred because of this company.. Stop this terrible incursion into the world of better inventions and let our economy work and prosper like no other country has ever done.

Stop the evil persecution of a man and company that has done so much for the world-- regardless of the wealth he has created for so many including himself-- Congratulate-- don't sue !!!
